

Specialty Areas

Industry and Technology

Manufacturing systems engineering, automotive engineering, engine production and precision mechanics.

Electrical engineering, electronics, micro-electronics, data systems technology, IT and telecommunication systems, entertainment electronics, household appliances.

Instrumentation and control systems, automation technology, machine tool manufacture, laser technology, packaging machinery, packing technology.

Power engineering, power plant technology, nuclear energy, including, but not limited to: fuels, fuel cycle, production of fuel assemblies, transport containers, reactor service; conventional power plants, alternative and renewable energies.

Construction and civil engineering, utilities management, heating and refrigeration systems, pump technology, sewage treatment plants.

Food industry, agriculture, brewing and beverage industry, chemical industry.

Quality management in all areas.

Business and Law

Business management, risk management, quality management

PowerPoint presentations, business planning and marketing

Banking and finance, cash flow reports, insurance industry

Business administration and economy

Contracts of all types (purchase contract, franchise and license agreement, employment contract, loan agreement, cooperation treaty, management contract etc.)

General terms and conditions, conditions of purchase, sales terms and delivery conditions

Patent law, patents

Documents and credentials, last wills and testaments, powers of attorney

Certifications

Marketing

Advertising material, press releases, tenders

Websites, presentations, pamphlets, advertisements, posters, newsletters, brochures

Medicine

Medical information material, patient information sheets

Doctor's reports, clinical findings

Pharmaceutics and pharmaceutical industry

Medical engineering, medical equipment and instrumentation
