

Due to the fact that an integral part of our quality assurance process is the specification of enquiries or jobs following certain criteria (checklist for the determination of requirements), information on prices is only available on request. In each case, a variety of factors must be considered for the price formation (text type, target group, document type, subject area, language, deadline, reference material, glossaries, style guides etc.).

Each customer is provided with an individual, tailor-made consultation and price calculation for his/her project.

We usually respond to your enquiry within a few hours (after 24 h at the most) and work out a detailed project schedule for you.

We will also be happy to visit you and present you a free offer without obligation.
